Para un mantenimiento ¡UNA SOLA VEZ!

- ▶ Cuando la bomba de agua falla, el líquido refrigerante se filtra sobre la banda de distribución.
- ▶ Una contaminación prolongada del líquido refrigerante causará finalmente la ruptura de la banda de distribución.
- ▶ La bomba de agua es un componente vital del sistema de refrigeración del vehículo.
- ▶ Asegura un flujo continuo de líquido refrigerante a través del radiador y del motor. Las bombas de agua modernas se accionan por la banda de distribución.
